

Technivance is a young and rapidly growing company that develops and maintains custom built software solutions and services. Technivance is currently in the midst of developing some very exciting products and web applications and is looking for exceptional quality assurance and testing software engineers to join the team and be part of a tremendous growth opportunity.

PHP Software Engineer – Code: [SEQAT]

Responsibilities:

- Designing and creating test cases and scenarios for all software products.
- Performing unit, integration, performance, functional, UI, deployment, load, and client acceptance testing.
- Ensuring all software produced meet its required specifications.
- Maintaining an active log and documentation of all activities.
- Working closely with software engineers and project managers to ensure all responsibilities are fulfilled.

Qualifications:

- Bachelor's degree in Computer Science or Engineering from a top university, MSc. is a plus.
- GPA of 3.5 [80% from public universities] or higher.
- Solid experience developing web-based test code using PHP and/or .NET.
- Working knowledge of Web 2.0 concepts.
- Fluent written communication and verbal agility are strong assets (in Arabic and English).
- Should be flexible and have the ability to research and quickly adapt to new technologies.

Compensation:

Technivance provides very comprehensive and competitive compensation and benefit packages.
